

Smart Technology

Readers, Credentials, and Alliance Program

Ready for a breath of fresh air?

Then say hello to aptiQ.[™] A forward-thinking product portfolio, plus marketing programs and support to help you focus on the future of our ever-changing security industry. aptiQ[™] simplifies your transition from older security platforms with a solution for every problem, no matter how complex. aptiQ[™] is ready with security solutions built for tomorrow.

Are you ready?

Introducing aptiQ[™] smart technology

simple. smart. better.

At the center of aptiQ[™] is an open architecture multi-technology reader designed to be ultra easy, complete, and versatile. Built to work with what you have now and into tomorrow— accommodating most manufacturers' magnetic stripe cards, proximity cards, aptiQ[™] smart cards, and the latest in mobile technology (NFC).

Working seamlessly alongside it, aptiQ[™] contactless smart credentials with a variety of data storage options and impressive data transfer rates in an open architecture design.

All this paired with aptiQ's[™] comprehensive support program that's so encompassing, it's like someone opened a door to a new day in customer service. All so you can perform like never before.

Simple means more freedom for you.

Think about readers for a moment. How would they play a part in your integrated security solution? They would be simple and smart. Easy to install and friendly to use. Adaptable to most access control systems, pleasing in any environment, and dynamic enough to welcome any change. That's exactly why we designed aptiQ[™] multi-technology readers. They are made specifically to simplify your access control solution—now and in the future.

PRODUCT FEATURES: aptiQ[™] READERS

- aptiQ[™] smart technology
 MIFARE[®] Classic & MIFARE DESFire[™] EV1
- **Highly secure smart technology** Mutual authentication between the card and reader, encrypted communication, and diversified keys protect data integrity and prevent unauthorized access

Open architecture

Multi-technology reader lineup that is able to read magnetic stripe, proximity, and aptiQ[™] (MIFARE[®] Classic and MIFARE DESFire[™] EV1 smart credentials)

A simple transition solution

aptiQ[™] makes your next technology upgrade simple and seamless when transitioning from magnetic stripe or proximity to smart technology

- Attractive, modern design
 Six contemporary designs in multiple finishes certain to complement any facility's architecture and décor
- Near Field Communication compatible Compatible with aptiQ Mobile Credentials
- Easy installation Standard wiring with quick-connect harness
- Easy sense sight and sound indicators LEDs plus audio feedback provide status for visually or audibly impaired
- Communication options

A standard Wiegand output provides flexiblity in choosing access control systems, and an optional RS-485 output provides more robust security

aptiQ™ Smart Mini-Mullion Reader

Model SM10

Frequency 13.56 MHz

aptiQ[™] Multi-Technology Mullion Reader

Model MT11

Frequency 13.56 MHz and 125 kHz

AVAILABLE FINISHES:

Our readers use an open architecture design following ISO 14443 standards and Wiegand protocol for interoperability with many popular access control systems.

aptiQ[™] Multi-Technology Single Gang Reader

Model MT15

Frequency 13.56 MHz and 125 kHz

aptiQ[™] Multi-Technology Single Gang Reader with Keypad

Model MTK15

Frequency 13.56 MHz and 125 kHz

aptiQ[™] Multi-Technology Single Gang Magnetic Stripe Reader

Model MTMS15

Frequency 13.56 MHz and 125 kHz Magnetic Stripe

aptiQ[™] Multi-Technology Single Gang Magnetic Stripe Reader with Keypad

Model MTMSK15

Frequency 13.56 MHz and 125 kHz Magnetic Stripe

HandPunch[®] GT-400 with Multi-Technology Reader featuring *aptiQ*[™].

The industry's most reliable biometric just got better. The HandPunch GT-400 brings the flexibility of a full-function time and attendance terminal together with a versatile multi-technology credential reader. Featuring aptiQ[™] smart card technology, the GT-400 allows employees to clock-in using the same credential they use to enter your building. Employees won't have to remember a PIN to use the HandPunch and you'll feel comfortable knowing that your system utilizes the best in security.

AD-Series Electronic Locks with Multi-Technology Readers featuring *aptiQ*[™].

We just opened up the future even wider. AD-Series electronic locks feature multi-technology readers that read a variety of proximity and smart cards. Built on the latest smart technology, AD-Series locks feature the aptiQ[™] technology as an open solution that allows you to keep up with future advancements. AD-Series multi-technology readers with aptiQ[™] showcase the best in speed, memory, efficiency, security, and future technologies.

Smart means you can store more than ever before.

$aptiQ^{\mathsf{m}}$ contactless credentials:

With aptiQ[™] credentials it's all about doing more with less effort. More data storage, to enable a broader variety of unique, demanding applications like biometrics and cashless vending. Faster data transfer for the ultimate efficiency and transaction safety. And a high-security platform, with encryption and mutual authentication to keep people, data, and assets safe and secure.

CLAMSHELL

FORM FACTORS:

ISO-STYLE CARD

KEY FOB

ADHESIVE PVC PATCH

PRODUCT FEATURES: aptiQ[™] SMART CARD USING MIFARE DESFIRE[™] EV1

Superior data storage

2K, 4K, and 8K bytes (16K, 32K, and 64K bits) of memory, providing high data storage options to meet the most demanding application needs

Impressive data transfer rates

Up to 848 kbps baud rate. That's roughly the same as transferring 100 pages from an encyclopedia - every second.

 Protects your most sensitive data with extra layers of security protection

Mutual authentication, AES 128-bit diversified key encryption, and message authentication coding (MAC) provides the high security that MIFARE DESFire™ EV1 is known for.

 Open architecture design leaves the door open

Built to ISO 14443 standards, allowing for the addition of applications for biometrics, transit, and point of sale applications such as cashless vending and cafeteria services.

Better service. Unheard-of support in the access control industry.

Our advanced line of high-security products comes with two distinct support programs to help you excel. The *aptiQ[™]* Alliance Program from Ingersoll Rand Security Technologies is a solution provider support program so rock solid—yet so simple—it's bound to take your business to new heights. With strategic marketing programs, smart security offerings, and better relationships, you'll perform like never before.

ASPIRE ALLIANCE PROGRAM

ASPIRE LEVEL PARTICIPANTS RECEIVE:

Joint Marketing Support:

- Product listing on Ingersoll Rand Security Technologies website
- Access to web portal, allowing access to sales enablement tools, collateral, product information, special offers, and pricing
- Compatibility press release
- Use of program trademark and logo
- Marketing exposure at tradeshows

Technical Documentation:

Technical integration support and access to technical documentation

ADVANTAGE ALLIANCE PROGRAM

ADVANTAGE LEVEL PARTICIPANTS RECEIVE:

Joint Marketing Support:

- Joint sales calls and lead generation program
- Access to Ingersoll Rand sales team to present
 new offerings
- End user/consultant roadshow/webinars
- Access to global Ingersoll Rand points of contact
- Company and product exposure in Ingersoll Rand monthly newsletters
- Access to Ingersoll Rand Security Technologies blog with communication opportunities

Technical Support:

• Advanced technology proof of concept demos

+ All the benefits Aspire level participants receive

For participation requirements at each Alliance level, please contact your Ingersoll Rand Sales Professional.
